DBT HEALTH CHECK SERVICE

MAXIMIZE THE VALUE OF YOUR DBT IMPLEMENTATION

Businesses often acquire new apps and software packages, yet are unable to take full advantage of the value they provide. Whether this is due to lack of resources, inadequate skills, vague business or technical requirements, or misalignment on software capabilities, the impact is frustrating and costly.

Avoid this situation and improve ROI with a Health Check service on any software implementations that are not being fully utilized.

WHAT IS A DBT HEALTH CHECK?

Ensure your organization is getting the most value from its dbt implementation, whether it's dbt Core or dbt Cloud. Data Clymer's dbt Health Check provides a holistic evaluation of an organization's dbt environment to help improve data performance, reliability, and trust.

This quick, one-time assessment will:

- Audit your existing dbt projects and workflows
- Assess your team's skills based on your data projects
- Evaluate your current architectural environment
- Develop a list of specific recommendations and implementation roadmap
- Educate data team members on dbt best practices and analytics engineering methodologies

As a trusted dbt Labs partner, Data Clymer has a proven methodology that has helped many dbt customers gain more value from their current dbt implementation.

THE DBT ANALYTICS ENGINEERING WORKFLOW

Raw Data → Develop → Test & Document → Deploy → Datasets → BI Tools / ML Models / Operational Analytics

Data Platforms

A DBT HEALTH CHECK SERVICE CAN HELP YOU:

- Boost data quality and trust
- Reduce time spent troubleshooting data pipelines
- Accelerate data democratization
- Improve data integration efficiency
- Promote better total cost of ownership

HEALTH CHECK SERVICE DELIVERABLES:

dbt Project Audit
Audit of existing dbt projects and workflows aligned with analytics engineering best practices

Recommendations and Roadmap
Prioritized list of recommendations and a suggested roadmap for improving dbt implementation

Skills Gap Assessment
Assessment of current team skills relative to technical and business needs and potential areas for improvement

Data Architecture Evaluation
Evaluation of current data stack and opportunities for enhancement to overall data platform

WHY DATA CLYMER?

dbt Experts	Modern Data Technologies	Tailored Solutions	Personalized Service
Our data team is skilled in dbt and in leveraging analytics engineering best practices to help improve data and business outcomes.	We only focus on cloud data architectures and technologies that make up the modern data stack, providing you with scalability and flexibility.	Benefit from a tailored data and analytics engagement process that is designed to support your unique requirements.	Data Clymer services are based on our values of transparency, trust, and collaboration, ensuring a high quality and exceptionally personalized level of service.

> "Data Clymer has been an amazing partner to help maintain and improve our BI stack so we can get business users the data and insights they need to make informed decisions."

– JENS NICOLAYSEN, CO-FOUNDER & CMO, SHINESTY
